PERFIL

Full Stack Developer with 3.5 years of experience designing and developing end-to-end software products—covering everything from architecture and data modeling to frontend, backend, integrations, and deployment. I have built SaaS products from the ground up and developed applications and features for real-world operations.

My key differentiator is the combination of technical expertise and 19 years of experience leading large-scale logistics operations at Correo Argentino, where I managed a workforce of over 3,000 people and a fleet of more than 900 vehicles. This background gives me firsthand insight into the operational challenges, processes, KPIs, traceability requirements, and business needs that a technology solution must address.

Core stack: React, Next.js, TypeScript, Node.js, NestJS, and PostgreSQL. I utilize AI tools such as Claude Code and Codex within an AI-native development workflow, while retaining full responsibility for technical decisions and software quality.

EXPERIENCIA PROFESIONAL

AI Logistics Agent — Personal project

- Development of an AI agent designed for querying and analyzing logistics documentation using RAG **(Retrieval-Augmented Generation).**
- Implementation of information retrieval, embeddings, semantic search, and reranking to improve response accuracy.
- Use of **Python, LangChain, LangGraph, ChromaDB, BM25, and LLMs**.
- Project aimed at exploring AI applications to enhance information access and query resolution within operational contexts.

Logistics Process and digital Solutions Consultant — VXT LOGÍSTICA Mar 2025 — Present

- Analyze workflows and define operational processes to identify areas for improvement and functional requirements.
- Collaborate with the development team to translate logistics knowledge and process understanding into software solutions applicable to aperations.

Full Stack Developer — Freelance *Nov 2022 — Present*

Design, development and deployment of proprietary and client-tailored software products, with complete ownership of the life cycle: architecture, database, frontend, backend and deployment.

- I am finishing a multitenant SaaS for service business management: each business manages multiple locations and professionals, agenda with online appointment reservation and waiting list, customizable website per business, integrated ecommerce, automatic reminders (email, and WhatsApp in development), email marketing, customizable gift cards and vouchers, daily cash and per person, roles and permissions, reports and dashboard.
- I developed an inventory and production management SaaS, in use by a food sales startup: input and stock control, formulas/recipes by product, automatic stock discount when loading production batches and when delivering orders, calculation of real costs by product and dashboard of sales, costs, profits, best customers and star product, parameterizable by date.
- Designed and deployed custom systems such as the Konektia CRM for law firms (50+ firms, 200+ active users) and the personnel management system for MVA SRL (~75 employees), including its institutional site.
- I integrated Mercado Pago as a collection gateway in multiple projects, including deposit collection or advance payments configurable by business to reduce absences in reserved shifts.

Frontend Developer — Jobchain *Nov 2024 — Present*

Platform with multiple verticals (wallet, exchange, payments, marketplace, social network, messaging). Team of 12 developers (4 web frontend, 4 mobile, 4 backend)—focus on web frontend.

- Independently designed and implemented the platform's complete WhatsApp-style messaging module—featuring 1:1 and group chat, multimedia sharing, voice and video calls, and in-chat cryptocurrency transfers—built on an XMPP server using Stanza.js and LiveKit, with OMEMO E2E encryption (XEP-0384) based on the Signal Protocol.
- Reduced load times from ~4s to ~1s (a 75% improvement) in complex UI flows using lazy loading and memoization, directly enhancing the user experience.
- Implemented the real-time notification system and live video streaming for the platform's integrated social network, alongside state management using Redux Toolkit.
- Participated in the analysis and implementation of frontend features—defining component structure, state management, and REST API integration—and translated Figma designs into responsive, pixel-perfect interfaces within a multidisciplinary team of 12 developers.
- Utilized AI-assisted development workflows (Claude Code) to accelerate technical research, debugging, and documentation, while maintaining full responsibility for the quality of the delivered code.

Head of Operations — Metropolitan Region (CABA and GBA) — Correo Argentino *2005 — 2024*

- Increased delivery efficiency from 74% to 98% and on-time delivery from 79% to 96% by redesigning processes and defining new operational KPIs.
- Redesigned transport logistics, reducing the operational fleet by 27%—along with associated costs—without compromising service levels.
- Led a team of 23 direct reports, with indirect management of over 3,000 employees and a fleet of 900+ vehicles across the metropolitan region.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Redux Toolkit, HTML5, CSS3, Tailwind CSS

Backend: Node.js, NestJS, Express.js, REST APIs, OpenAPI, Python, FastAPI

Databases: PostgreSQL, MongoDB

Messaging / Real-time: XMPP (Stanza.js), OMEMO / Signal Protocol, WebSockets, LiveKit

Cloud & DevOps: Docker, Vercel, Supabase, Railway, Render, CI/CD, AWS (básico)

AI-Native Development: Claude Code, Claude, ChatGPT, Prompt Engineering, AI Agent Design, RAG, LangChain, LangGraph, MCP

Payments & Notifications: Mercado Pago (checkout, cobro de señas/pagos adelantados), Resend (email transaccional)

Testing & Tools: Vitest, Jest, Git, GitHub, GitLab

EDUCATION

- **AI Engineering** — CoderHouse (2026)
- **AI Agents & Prompt Engineering** — CoderHouse (2026)
- **Desarrollo Full Stack** — Henry (2024)
- **Desarrollo Full Stack** — CoderHouse (2022–2023)
- **Bachelor's Degree in Business Administration** — Universidad Católica de Salta (2001–2005)

LANGUAGES

Spanish: Native • **English**: B1/B2
